SUMMARY

Eric Madsen is a financial expert specializing in complex financial analysis, securities, accounting, business valuations, and economic damages. He has extensive experience analyzing fraud-on-the-market claims, public-company disclosures, alleged material misrepresentations and omissions, management forecasts, and other financial evidence in complex commercial and securities disputes. He has been retained by leading U.S. law firms to prepare expert reports and has testified in the Delaware Court of Chancery, U.S. Tax Court, U.S. District Court, JAMS arbitration, before the International Centre for Settlement of Investment Disputes, and in various state courts. His matters have involved shareholder and securities litigation, co-founder squeeze-outs, SEC investigations, valuation disputes, and economic damages. Madsen is a Certified Public Accountant (CPA), Chartered Financial Analyst (CFA) charterholder, and Accredited in Business Valuation (ABV).

CREDENTIALS

Chartered Financial Analyst CFA Charterholder

Certified Public Accountant (California)

Accredited in Business Valuation (ABV), AICPA

EDUCATION

M.B.A., UCLA Anderson School of Management, Los Angeles, California, 2008

B.S., Economics, Brigham Young University, Provo, Utah, 2001

PRESENT EMPLOYMENT

Berkeley Research Group, 2019-Present, Managing Director, Los Angeles, California; Salt Lake City, Utah

PAST POSITIONS

Compass Lexecon, 2013-2019, Senior Vice President, Pasadena, California

Fulcrum Inquiry, 2008-2013, Manager, Los Angeles, California

LECG, 2001-2007, Consultant, Los Angeles, California (Salt Lake City, Utah, 2001-2003)

CONSULTING EXPERIENCE – VALUATION AND FINANCIAL ANALYSIS

- Valuation – Investment Company – Valued a substantial minority position in a private investment firm that targeted high-growth, pre-IPO, tech companies in a dispute that involved the squeeze out of a co-founder at a disputed purchase price following a reverse-stock split under Delaware law. The valuation included an assessment of SAFES (Simple Agreements for Future Equity) issued by the company for startup financing.

- Valuation – Consumer Goods – Assessed projections and valuation analysis presented in a tax court proceeding involving the transfer price of a substantial minority interest in a company that sells products for babies and new mothers.

- Valuation – Advertising – Opined on how the transaction price of a business would have been affected had the seller properly disclosed that the seller's largest customer intended to leave after the transaction was completed; also opined on how the company's valuation was affected by the seller making undisclosed promises of employee bonuses.

- Valuation – Crypto Currency – Assessed the value of a position in cryptocurrency where Plaintiff contended he was ultimately denied a promised allotment of crypto coins generated by his employer together with promised shares in the company. A valuation of the coins was needed to determine the value of the allegedly denied allotment together with the value of the company.

- Financial Analysis – Pharmaceuticals – Determined a range of dividend rates and face values associated with the contemplated issuance of preferred shares that would be expected to prevail in an arm's length transaction entered into by a subsidiary of an international pharmaceutical company.

- Valuation – Entertainment – Valued a company that serves musicians and music labels with copyright detection technology, royalty tracking, and content monetization. Counsel used the valuation in a successful mediation between the company and a former major shareholder who contended that a share repurchase agreement struck during the pandemic market crash vastly undercompensated him for his shares in the company.

- Financial Analysis – Construction – Analyzed the effect of partial disclosures and materializations of risk on the prices of two bonds issued by a major Brazilian construction company that was involved in the "Car Wash" (a.k.a. "Lava Jato") scandal. Plaintiff, a hedge fund that held substantial positions in the bonds, suffered economic loss by holding the bonds during the period over which the company's participation in the scandal became public information.

- Financial Analysis – Technology – In response to an SEC investigation, analyzed stock price movements resulting from a publicly traded technology company's disclosures regarding a security token offering, the company's blockchain technology, and investments from a private equity firm. Analysis included an assessment of the statistical and economic relevance of stock price movements.

- Financial Analysis – Broadband Spectrum – Applied discounted cash flows analysis to assess the value of educational broadband spectrum rights granted by the Federal Communications Commission.

- Financial Analysis – Real Estate – Traced movements of a multi-million-dollar deposit among financial accounts. The deposit was made by a New York charter school for exclusive use as advance rent but was allegedly misappropriated for other purposes.

- Valuation – Technology – In various matters, performed valuation analysis to determine the appropriate transfer price of intellectual property transferred by technology companies to wholly owned foreign subsidiaries in challenges brought by the United States Internal Revenue Service.

- Financial Analysis – Health Care – In response to an SEC investigation regarding alleged insider trading, disaggregated a substantial stock-price decline between the alleged insider information and other company disclosures made the same day, including the company's filing of Form 12b-25 and disclosures related to declining financial performance.

- Valuation – Product Distribution – Rebutted contentions that a common method could be applied to calculate economic damages on a class-wide basis in a matter that alleged a consumer products company paid less than fair values to buy out various owners of distribution routes for its products. Demonstrated that valuation methodologies as they were applied to the distribution routes required individualized analyses that depended on facts and circumstances related to each route.

- Valuation – Technology – Assessed the value of a minority interest in a private Silicon Valley technology company and related economic damages in a matter where the company allegedly blocked the sale of the plaintiff's equity position in the company. Considered contemporaneous economic evidence from the company's primary offerings, mutual fund disclosures, and trading prices of comparable public companies. Also prepared a discounted cash flows valuation model.

- Financial Analysis – Consumer Payments – Analyzed how including investment in intangible assets as part of a company's book value affects accounting-profitability metrics, such as return on equity and return on assets; analysis utilized in an expert rebuttal report submitted in a class-action, antitrust lawsuit against a major credit card company.

- Financial Analysis – Analyzed stock price movements in response to alleged wrongful statements made by the Chief Financial Officer of a publicly traded bank who was under investigation by the SEC. Demonstrated that the statements did not have a material effect on stock price. SEC concluded the investigation without recommending an enforcement action.

- Financial Analysis – Retail, Home Improvement – In a class-action shareholder lawsuit, analyzed the effect of various announcements on the stock price of a publicly traded retailer of home-improvement goods. At issue was the company's announcement that it would "go dark," meaning it would no longer adhere to public-reporting requirements and delist from the Nasdaq exchange. Analysis considered confounding factors that also affected the company's stock price, including company announcements regarding dividend suspension, termination of its share repurchase program, board member resignation, and declining financial performance.

- Financial Analysis – Retail Banking – Assessed the materiality of stock price movements in response to negative news about a major bank in a matter that alleged that bank executives made false representations to investors.

- Financial Analysis – Real Estate Investments Trusts – Analyzed economic damages to a major real-estate investment trust (REIT) that arose when a withdrawn audit opinion allegedly delayed its acquisition of another REIT. Rebutted an opposing expert who quantified damages from the alleged delay by comparing the merger agreement to an exchange option.

- Valuation – Telecom – Valued equity interests and equity-purchase options of a minority shareholder in an Iraqi telecom company to assess damages that resulted from the Iraqi Communications and Media Commission's decision to render invalid the minority shareholder's investment and options.

- Valuation – Entertainment – Valued the operating assets of a concert and entertainment company that leases stage and lighting products for concerts and other live shows.

- Financial Analysis – Securities – Rebutted analysis that claimed market expectations regarding the recoverability of asset value could be discerned based on the accounting treatment of write offs to mortgage-backed securities that were allegedly fraudulently sold under misrepresentations and omissions.

- Valuation – Manufacturing – Valued a manufacturer of printer products used in gaming environments to assess damages associated with alleged non-disclosures in a sale of the manufacturer.

- Valuation – Manufacturing – Assessed a financial advisor's valuation of shares held by a class of minority shareholders in a manufacturer of electronic components that serves the wireless communications, power management, military, and automotive industries. The minority shareholders were forced to sell their shares allegedly at below fair market value when the majority shareholder conducted a short-form merger.

- Valuation – Entertainment – Valued the operating assets of a Major League Baseball team in litigation that challenged the team's ability to sell its media rights in an open auction. Developed a financial model to estimate how the team's value would be affected if the team did not honor a network's "rights of first refusal" and "rights of first negotiation" clauses contained in its media rights contract.

- Valuation – Entertainment – Assessed a financial advisor's valuation of its takeover target; a shareholder lawsuit alleged the acquirer—a publicly traded, international media company—vastly overpaid by several hundred million dollars for a television and film production company, bringing the advisor's valuation into question.

- Valuation – Mining – Valued a precious-metals mining company in a dispute over the accuracy of accounting records provided in the due diligence phase of the transaction; estimated the company's fair market value assuming the corrected accounting records been disclosed.

- Valuation – Investment Management – Assessed a financial advisor's valuation of a minority interest in a privately held investment management firm; the interest belonged to a co-founder and managing partner of the investment firm who was terminated, resulting in a forced sale of his shares allegedly at below fair market value.

- Valuation – Manufacturing – Performed valuations to calculate economic loss suffered by shareholders of a manufacturing company in New Zealand that resulted from alleged misstatements and omissions among disclosures in an initial public offering.

- Valuation – Hospitality – Appraised a privately held luxury resort and winery located in Napa Valley, California as part of a dispute between owners involved in a buyout.

- Valuation – Education – Performed a valuation of a non-profit college that offered degrees and certificates in the medical field to assist the parent company's preparations to sell the college.

- Valuation – Manufacturing – Valued a niche soda-pop manufacturer as part of a dispute between owners that sought to end management differences through a shareholder buyout.

- Valuation – Manufacturing – Appraised the U.S. distribution arm of a Japanese company that manufactures matcha green tea.

- Valuation – Entertainment – Valued products sold by a multi-level marketing company in the music industry accused by the Federal Trade Commission of operating an illegal pyramid scheme.

- Financial Analysis – Technology – Assisted a start-up company in a valuation and sale of a patent for parcel-tracking technology. Estimated the patent's value using discounted cash flows analysis and performed research to identify the ideal consumer market and likely buyers of the patent.

- Valuation – Consumer Retail – Valued an art seller's retail location (locational goodwill) in an eminent domain proceeding to compensate the retailer for value lost by having to vacate its longstanding premises.

- Valuation – Consumer Products – Appraised a company that sells health products under license from a widely recognized brand on behalf of a minority shareholder whose ownership interest was unrecognized by other owners of the company.

- Financial Analysis – Communications – Analyzed the ability of a broadcasting company to meet its financial obligations under various possible outcomes related to the Federal Communications Commission's auction of broadcast spectrum rights.

- Financial Analysis – Transportation – Addressed issues raised by the Surface Transportation Board regarding the calculation of railroad revenue adequacy; performed an economic assessment of the effectiveness of the stand-alone cost constraint, the simplified stand-alone cost constraint, and a revenue-adequacy rate constraint based on the overall financial health of a railroad.

- Financial Analysis – Consumer Products – As part of a dispute between owners of a large, privately held beverage company, assessed a company's dividend distribution patterns and liquid asset levels to determine whether the company maintained appropriate or excessive amounts of cash.

- Financial Analysis – Energy – Performed analysis in response to allegations that several energy companies wrongfully characterized shareholder distributions as dividends rather than returns of capital due to errors in the calculation of Earnings and Profits, thus allegedly causing tens of millions of dollars in damages to the companies' shareholders on account of overpaid taxes.

- Financial Analysis – Entertainment – In a class action matter against a tickets seller involving over 50 million members, tabulated transaction counts, transaction fees, and purchase concentration ratios for various class subgroups (e.g., customers with substantial purchase volumes) from the company's transaction database (nearly 200 million records) to assist with case settlement.

- Financial Analysis – Technology – Utilized a licensee's transaction database to determine the amount of unpaid royalties due to a company that licenses data-backup capabilities.

- Financial Analysis – Real Estate – Assessed the effects of groundwater contamination on residential property values using real estate transaction data and regression analysis in several class action matters that pitted homeowners against manufacturing companies allegedly responsible for the groundwater contamination.

CONSULTING EXPERIENCE – ECONOMIC DAMAGES

- Economic Damages – Advertising and Intellectual Property – Assessed economic damages suffered by the founder, CEO, and spokesperson of a Los Angeles-based insurance company that markets primarily through outdoor billboard advertising inflicted by a competing insurance company that used the exact image of the spokesperson in their own advertising on outdoor billboards.

- Economic Damages – Healthcare – Calculated economic damages incurred by county and city governments in a lawsuit against manufacturers of opioid prescription drugs.

- Economic Damages – Oil and Gas – Calculated economic damages related to the alleged breach of two related contracts—one that governed the sale and purchase of marine distillate oil and another that governed the lease of several oil tanks located in the Port of Long Beach.

- Economic Damages – Oil and Gas – Evaluated economic damages related to the client's alleged repudiation of a contract to supply oil-based coating to a manufacturer of roofing products. Repudiation occurred after the WTI oil price index departed from world oil prices (e.g. Brent) due to an oil supply glut in Cushing, Oklahoma, thereby affecting the contract's pricing mechanism.

- Economic Damages – Marketing – Calculated economic damages to a marketing firm that arose from alleged wrongful cancellation of its contract with an online car review company to sell "customer lead" subscriptions and other marketing tools to auto dealers.

- Economic Damages – Marketing – Valued economic damages to a distribution company that arose from alleged wrongful cancellation of a sports equipment distributorship agreement.

- Economic Damages – Hospitality – Calculated economic damages that arose from early termination of a company's contract to run a lobby bar at a major hotel in San Diego, California.

- Economic Damages – Healthcare – Calculated economic damages due to an Alaska hospital arising from an alleged breach of contract with the hospital's emergency air transport services provider.

- Economic Damages – Marketing – Quantified lost profits that resulted from a credit reporting agency's reliance on an external marketing channel that sold outside its assigned territory and thereby wrongfully competed with the agency's internal marketing arm.

- Economic Damages – Consumer Products – Calculated economic damages to a class of consumers resulting from a beverage company's allegedly false claims of health benefits attributable to drinking its juice products.

- Economic Damages – Consumer Products – In three separate false advertising matters (each involving the same plaintiff but different defendants), rebutted consumer surveys that claimed to demonstrate extensive product substitution between the plaintiff's juice brand and the defendant juice brands accused of false advertising. Calculated economic damages from the alleged false advertising.

- Economic Damages – Insurance – Calculated economic damages suffered by a furniture manufacturer from a fire that burned down one of the company's manufacturing sites in a dispute between the manufacturer and its insurer.

- Economic Damages – Energy – Calculated lost profits to a wind energy company that would result if a competitor proceeded with positioning a wind farm upstream from the company's wind farm.

- Economic Damages – Lost Business – Calculated economic damages in a medical malpractice matter involving a plaintiff who allegedly lost a business opportunity on account of the injury. Damages entailed an assessment of the business opportunity's profitability prospects.

- Economic Damages – Lost Business – Identified alternative explanations for a steep sales decline of a formerly highly successful lighting business whose 50% owner/operator lost sight in one eye as a result of alleged medical malpractice. Calculated economic damages related to the alleged malpractice.

- Economic Damages – Injury – Calculated economic damages due to wrongful death or personal injury in a series of matters related to a major pipeline explosion in San Bruno, California.

- Economic Damages – Environment – As part of litigation involving a California forest fire that consumed thousands of acres, critiqued an expert witness's Habitat Equivalency Analysis used to measure one component of the fire's economic damages.

- Economic Damages – Consumer Products – In a class action lawsuit against a major electronics retailer, estimated damages from hidden costs that the retailer imposed when customers redeemed their warranties.

- Economic Damages – Lost Business and Wages – Determined the value of future lost wages and lost business opportunities resulting from injuries arising due to alleged police brutality.

CONSULTING EXPERIENCE – INTELLECTUAL PROPERTY

- Intellectual Property – Online Marketing – Assessed economic damages arising from theft of trade secrets that allegedly occurred when an online marketing company licensed its platform to another online marketing company.
- Intellectual Property – Manufacturing – Calculated economic damages to an industry-dominant printer cartridge OEM in a dispute that alleged that a China-based manufacturer infringed four of its patents; Analysis considered the availability of non-infringing alternatives to the patented products consistent with the Panduit factors and estimated royalties that the disputing parties would have agreed upon in a hypothetical negotiation, consistent with the Georgia Pacific factors.
- Intellectual Property – Consumer Products – Calculated lost profits in a trademark infringement that involved a major clothing retailer's alleged improper use of a niche t-shirt maker's trademark in one of its seasonal catalogues.
- Intellectual Property – Consumer Products – Calculated lost profits and reasonable royalties due to a manufacturer of artificial hair fibers due to a competitor's infringement of some of the manufacturer's patents.
- Intellectual Property – Consumer Products – Calculated economic damages that resulted from a copyright dispute between two companies with competing mobile stereo systems branded with similar names.

CONSULTING EXPERIENCE – LABOR & EMPLOYMENT

- Labor & Employment – Assessed claims of systematic race discrimination in employee wages by analyzing statistical relationships among employee salaries, promotion histories, education levels, performance reviews, and demographic data.
- Labor & Employment – Used statistical analysis to assess the likelihood that company executives were assigned stock options to begin on dates that turned out to be favorable without having backdated the options.
- Labor & Employment – In multiple matters, utilized punch-card databases to calculate potential liability and economic damages in wage-and-hour class action matters that alleged companies failed to properly compensate employees for missed and late meal periods and missed breaks.

CONSULTING EXPERIENCE – ANTITRUST

- Antitrust Economic Damages – Motor Vehicles – Calculated economic damages arising from alleged anticompetitive practices among providers of electronic vehicle registration ("EVS") services. Plaintiff had been blocked from accessing essential data in dealership management systems by providers of those systems that also provided EVS services.

- Antitrust – Entertainment – Analyzed allegations that two major film exhibition chains and several major distributors conspired to monopolize exhibition of hit films and thereby minimize competition from other film exhibitors.

- Antitrust – Manufacturing – Tested econometric models and analyzed econometric trends in a case that alleged collusion among vitamin manufacturers. Statistical models identified factors that affected vitamin pricing.

- Antitrust – Agriculture – Analyzed auction price histories in a matter involving tobacco farmers that alleged that tobacco manufacturers rigged bids to obtain tobacco at below-market prices.

- Antitrust – Transportation – Measured the effect on a cab company's market share that resulted from exclusive arrangements between a competing cab company and cab stands at certain destination properties.

- Antitrust – Consumer Products – Analyzed damages in an antitrust bundling matter that pitted retailers against a major manufacturer of clear tape. Plaintiffs alleged that the manufacturer's rebate program–based on rewards gained by making purchases across the manufacturer's various product categories–strengthened the manufacturer's alleged monopoly on clear tape, resulting in inflated prices.
