PRESENT EMPLOYMENT

Director in BRG's Machine Learning and Artificial Intelligence Practice

Dion Gibson has over fourteen years of experience in electronic discovery, project management, and artificial intelligence and machine learning. He has managed multiple global teams with expertise in the development and execution of electronic discovery technology strategies. He has developed innovative methods to integrate customized machine learning results in various data hosting platforms while guiding eDiscovery professionals to navigate and comprehend the results.

He has delivered winning bids in response to multiple requests for proposals within data management, migration, and support. He has led and managed hundreds of electronically stored information (ESI) projects, ranging from multi-party litigations to government contracts requiring on-site support with complex datasets and rigid timelines.
