## BRG FOUNDATIONAL SERVICES AND AREAS OF INDUSTRY EXPERTISE THAT SERVE THE HEALTH SECTOR

### Data & Analytic Services:

We provide expertise in large-scale health data modeling and management, specializing in reimbursement, regulatory compliance, and high-stakes litigation and investigation support to help clients navigate complex legal challenges and mitigate risk.

### Health Policy:

We provide strategic foresight for a shifting federal and state policy landscape by translating complex legislative changes – from payment system design to program evaluation – into actionable strategies.

### Integrated Risk Management, Data Security & Compliance:

We integrate advanced security protocols with industry compliance expertise, to help clients mitigate systemic risk and transform complex data governance into a foundation for operational and digital trust.

### Investigation & Litigation Services:

We provide clarity and technical rigor to help clients navigate high-stakes disputes by pairing deep industry expertise with advanced forensics and analytics to address allegations of wrongdoing—from fraud enforcement to contractual disagreements to class action litigation.

### Transaction Advisory, Due Diligence & Market Strategy:

We help investors and organizations identify and execute high-value transactions by combining financial and operational due diligence with market strategy to help mitigate risk and accelerate value creation.

INTELLIGENCE THAT WORKS
