

GLOBAL CONSTRUCTION

Construction International Arbitration

BRG's Global Construction professionals have testified in international arbitrations in areas such as schedule/program, productivity loss/disruption, quantum/cost, technical/defects and project management/controls.

They have provided these services across major industry sectors and internationally on projects located across the United States and in South and Latin America, Europe, the Middle East, Asia and other regions. BRG experts have provided reports and testimony in a variety of international arbitration tribunals, including ICC, ICSID, DIAC, IAC, KCAB, etc.

Large construction projects are often designed and constructed by multinational firms bound by terms and conditions that include local laws, customs and regulations. When parties to the dispute, their counsel or the tribunal decide to retain the services of experts, BRG professionals can provide objective, independent and reasoned advice to claimants, respondents or arbitration panels based on their extensive worldwide experience. Many of BRG's Global Construction professionals specialise in international arbitration and possess a range of relevant skills and qualifications in areas including scheduling/programming, accounting, estimating, engineering, project controls, construction management, risk management, economics, finance, intellectual property, valuation, statistics and strategic analysis.

Our experts and staff come from different backgrounds, industries and geographies, which helps give our clients access to a diverse range of senior talent directly suited to the industry, jurisdiction or issues at hand.

Services

DISPUTE RESOLUTION
