## SUMMARY

Denise Allar is a veteran healthcare executive who has over thirty years of healthcare leadership and clinical operations management experience, primarily within large academic and community hospitals. Bringing perspective as both a practiced clinician and consultant, she has helped hospitals and health systems across the country increase operational effectiveness through improvements to patient throughput, organizational leadership, staffing, scheduling, and skill mix. With a focus on care management and patient throughput assessment and implementation, she is skilled in guiding healthcare organizations through the improvement of their strategic, financial, operational, and market performance. Ms. Allar has experience:

- Operationalizing vision and strategy, managing change, helping develop others, and driving success and achievement
- Developing collaborative partnerships with senior executives, physician leaders, operations managers, and staff
- Driving consistency of quality and experience for patients and their families
- Communicating with and advising key stakeholders in the decision-making process
