SUMMARY

Tiffany Young specializes in managing complex business litigation projects that require quantitative and statistical analysis of large data.

Ms. Young has extensive experience in large-scale antitrust litigation, including class certification, merits, mergers and acquisitions, patent infringement, and damages, and has consulted on matters involving regulatory investigations in the financial services industry. She has presented findings to the US Securities and Exchange Commission, other regulatory agencies, and boards of directors. She has consulted on a wide range of industries including financial services, healthcare, pharmaceuticals, food services, retail, and energy.
