Summary

Tiffany Young specializes in managing complex business litigation projects that require quantitative and statistical analysis of large, complex data combined with qualitative analysis.

Ms. Young has extensive experience in large-scale antitrust and business litigation, including class certification, merits, mergers and acquisitions, patent infringement, wage and hour issues, securities, and damages. She has consulted on matters involving regulatory investigations in the financial services industry and has presented findings to the Securities and Exchange Commission (SEC), other regulatory agencies, and boards of directors. She has consulted across industries including financial services, healthcare, pharmaceuticals, food service, retail, transportation, mining, and energy.

SELECTED PROJECTS

- **Lawsuits Involving Securities Markets**

Managed an engagement involving the alleged share price impact of withholding of alleged material information for a Fortune 500 company. Performed an analysis of the qualitative record, including company statements, analysts reports, news articles, in conjunction with the share price patterns.

- **Lawsuits Involving the Impact of Transition of Payroll Systems**

Managed multiple engagements which purport that the transition of payroll systems allegedly caused employee wage underpayments. Led a team which analyzed and consolidated large datasets for over 20,000 employees from multiple systems (hours, payroll and HR related data) to estimate the exposure of the payroll system transition by recreating the wages which should have been paid and comparing to what employees were paid.

- **Lawsuit Involving Impact of Alleged Illegal Competitor Entry**

Managed an engagement involving the assessment of the impact of an alleged illegal competitor entry. Performed an event analysis to estimate the relative impact of regulatory and competitor events on taxi medallion prices in Australia, which involved summarizing and consolidating multiple datasets. Helped draft expert report and exhibits.

- **Lawsuit Involving Alleged Anticompetitive Acts in Foreign Exchange Market**

Managed a three-year engagement spanning two jurisdictions (US and UK). The lawsuit involved over 30 named parties and resulted in a successful settlement via mediation. Performed a wide range of tasks to support discovery and expert analysis including requesting, processing and analyzing over 30 terabytes of data for discovery, aggregating complicated data from over 40 sources, measuring the impact of the alleged acts and estimating damages, applying machine learning techniques to identify potentially fraudulent behavior, and preparing memoranda, presentations, and demonstratives.

- **Class Certification for Alleged Anticompetitive Acts in Securities Market**

Analyzed large-scale transaction level data in conjunction with third-party data.

- **Mergers Between Large Retail and Wholesale Gasoline Companies**

Performed product and geographic analysis. Analyzed competitive effects. Helped draft white papers and presentations.

- **Merger Between Two Large Chemical Processing Companies**
Performed detailed efficiencies analysis. Helped draft white papers and presentations.
- **Canadian Competition Bureau Investigation of Waste Services Merger**
Performed product and geographic analysis. Analyzed competitive effects.
- **Mergers Between Automotive Parts Manufacturers**
Performed product and geographic market analyses.
- **Proposed Merger Between Natural Gas Pipeline Companies**
Performed complex geographic market analysis.
- **Merger Between Retail Coffee Chains**
Analyzed transaction level data to perform product market analysis.
- **Mergers Between Two Large Textbook Publishers**
Performed product and geographic analysis. Analyzed competitive effects. Helped draft white papers and presentations.
- **Merger Between Supermarket Chains**
Performed product and geographic analyses.
- **Merger Between Drug Store Chains**
Performed product and geographic analyses.
- **Lawsuit Involving Rival's Alleged Antitrust Claims in the Entertainment Industry**
Performed product and geographic market analyses utilizing transactions level and industry data. Analyzed potential competitive effects. Helped draft report, exhibits, and prepare the expert for deposition.
- **Lawsuit Involving Alleged Antitrust Claims in the Pharmaceutical Industry**
Performed product market analysis using company sales data and third-party data to analyze antitrust claims related to raising rivals' costs and foreclosure allegations.
- **Tribal Trust Litigation**
Performed complex analysis related to allegations of mismanagement of tribal funds.
- **SEC Investigation into Alleged Negligence of Asset Management Fund**
Managed the investigation of alleged errors in complicated asset allocation models and measured the potential impact of alleged errors. Delivered a presentation to the client's board of directors and multiple presentations to the SEC.

- **DOJ, State AG and Private Party Lawsuits Against Large Health Insurer**
Analyzed insurance claims data. Performed product and market definition analyses
- **FTC Investigation into Banking Industry**
Analyzed detailed banking and mortgage lending data to determine potential impact of alleged misconduct prior to the early 2000s financial crisis.
- **FTC Investigation into Payday Loans**
Analyzed large-scale transaction level data to determine potential impact of alleged misconduct.
