Mr. Wentz is the Managing Director of BRG's Construction Practice in Texas. With over twenty-seven years of project controls and claims consulting experience on construction projects, Mr. Wentz has provided consulting services to owners, developers, general contractors, subcontractors, and municipalities. His consulting experience focuses on evaluation of damage claims, delay analysis, construction management, project scheduling, dispute resolution, construction audits, and general construction litigation services. Mr. Wentz is skilled in analyzing project delays and quantifying damages resulting from unanticipated impacts, inefficiencies, and disruptions on both large and small construction projects, and has provided expert testimony on cost and delay related damages. His project experience has included power generation and transmission, processing plants, oil and natural gas pipelines, water treatment plants, commercial construction, public transportation, institutions, entertainment industry, multi-family, and heavy highway.

## **PREVIOUS POSITIONS**

### **McCullough & Associates, Dallas, Texas Principal Consultant**

Mr. Wentz was a Principal Consultant for a construction consulting firm providing dispute resolution and project management services. In this capacity, Mr. Wentz assisted clients in analyzing and preparing damage and delay claims. Mr. Wentz also advised clients in the areas of general construction management, change order management, document control, cost control, and project scheduling.

### **Resolution Management Consultants, Inc., Marlton, New Jersey Management Consultant**

Served as a Management Consultant for nationally recognized firm specializing in construction dispute resolution, claims avoidance, schedule analysis, construction audits, and project management services. Evaluated and prepared claims for contractors, owners and government agencies. Provided assistance and guidance to contractors and owners in the areas of scheduling, document control and trade buy outs on casino resorts and improvements.

### **Baker Concrete Construction, Inc., Washington, D.C. Divisional Project Controls Manager**

Served as Mid Atlantic Project Controls Manager for one of the nation's largest concrete contractors. Member of the project management team on a multitude of structural contracts including parking garages, office buildings, hospitals and sports arenas. Developed and maintained CPM schedules and Earned Value processes for all regional projects. Assisted counsel and consultants in preparation of construction related claims.

### **IT Corporation, Houston, TX Project Controls Engineer**

Served as a Project Controls Engineer for a nationally recognized environmental engineering firm. Developed and maintained project schedules and budget on multiple private and government owned environmental remediation contracts. Assisted Project Managers in reviewing and administering subcontracts. Reviewed subcontractor claims. Prepared, submitted, and negotiated change orders and requests for time extensions.
